About Me

B.Tech Computer Science graduate (May 2026) with hands-on experience in Flutter and the MERN stack, including a Flutter internship at Movenetics Digital delivering payments, authentication, and push notifications. Also experienced in industrial automation (PLC, HMI, drives) and IoT with ESP32 and Arduino. Seeking a developer or automation role in the UAE.

Experience

Movenetics Digital Private Limited **May 2026 – Aug 2026**

Flutter Developer Full-time Intern *Remote*

- Developing two interconnected Flutter applications — an event management app for organizers and a matchmaking/event-registration app for end users — using **GetX** for state management and a shared **Firebase** backend (Auth, Firestore, Cloud Messaging).
- Implemented **Stripe** payment integration for paid event registrations, including Cloud Functions for payment record writes, status normalization, and UPI support.
- Integrated **Google Maps API** for event location selection and display within the event creation and browsing flows.
- Built secure phone OTP–based authentication with **Firebase Auth**, and resolved a critical verification bypass issue by restructuring Firestore write timing.
- Debugged and optimized Firebase Cloud Messaging push notification delivery across Android, including token lifecycle handling and permission management.

Lucky Automation **Jun 2024 & Jun 2025**

Automation Intern (Seasonal Internship)

- Replaced faulty **HMI** units and restored existing HMI projects on replacement hardware to maintain machine operation.
- Replaced and configured **drive units** used in automated industrial machinery.
- Replaced **PLCs** and reloaded existing PLC programs to restore machines to their original operating conditions.
- Returned for a second summer internship, continuing hands-on work with **industrial automation systems**.

PM Square Soft Services Pvt. Ltd. **Jan 2023 – May 2023**

Flutter Developer Intern

- Developed **SoilTester**, a new Flutter application from scratch, using **BLoC** for state management and **Firebase Authentication** for secure user authentication.
- Worked on **Hive Parking**, implementing a complete UI reskin in Flutter based on **Figma designs**, updating existing screens to match the new design specifications.
- Translated Figma designs into responsive Flutter interfaces while maintaining consistency across screens and preserving existing application functionality.

The Zigma Technologies India (P) Limited **Sep 2022 – Dec 2022**

IT Support *Indian Overseas Bank*

- Replaced legacy Windows 7 systems with newer PCs as part of desktop modernization and configured Windows operating systems based on hardware compatibility.
- Installed and configured **Windows 11** on PCs meeting the required hardware specifications.
- Configured PC network settings, including **workgroup configuration and domain joining**, to connect systems to the bank's network environment.
- Performed **MAC address whitelisting** to enable authorized devices to access the network.
- Troubleshot hardware and connectivity issues involving **CPU, printers, routers, and CCTV systems** to support daily IT operations.

Skills

Mobile: Flutter (BLoC, Provider, GetX), Dart, Firebase (Auth, Firestore, FCM, Cloud Storage)
Frontend: React.js, Three.js, GSAP, Material UI, Vite
Backend: Node.js, Express.js, Socket.IO, REST APIs, MongoDB Atlas
Languages: Dart, JavaScript, Python, Java, C++
IoT, Hardware & Automation: ESP32, Arduino, PLC Programming, HMI Design
Tools: VS Code, Android Studio, Git, GitHub, Postman, Figma, Blender
Spoken Languages: English (Professional) · Tamil (Native)

Projects

Smart Plant Health GitHub

- Built a mobile app that detects plant diseases from photos using a custom-trained TensorFlow Teachable Machine model, and displays disease-specific curing tips to the user.
- Integrated Firebase Authentication for secure user access; designed and developed the full Flutter frontend with a clean, intuitive UI.
- **Stack:** Flutter | Firebase (Auth) | TensorFlow (Teachable Machine)

Three.js Portfolio GitHub | Live

- Designed and built an immersive 3D portfolio themed around "Courage the Cowardly Dog", featuring custom scene navigation, smooth GSAP animations, and a self-modeled house asset created in Blender.
- Demonstrates strong integration of creative design with technical execution — combining WebGL rendering with React for a fully interactive web experience.
- **Stack:** React.js, Three.js, GSAP | 3D Assets modeled in Blender

Dev-Hub GitHub | Live

- Developed a real-time social networking platform for developers, featuring topic-specific group chats (React, Flutter, Three.js), community Q&A, and collaboration tools.
- Architected the full backend using Firebase Firestore for real-time data sync and Firebase Auth for secure user management; deployed on Vercel.
- **Stack:** React.js (Vite) | Firebase (Auth, Firestore)

SheSOS GitHub

- Building a women's safety app with real-time GPS tracking via Google Maps, one-tap SOS alerts, volunteer dispatch, and emergency contact management.
- Implemented real-time location sharing using Socket.io and push notifications via Firebase Cloud Messaging (FCM); data persisted in MongoDB Atlas.
- **Stack:** Flutter (BLoC) | Node.js (Express.js, Socket.IO, Google Maps) | Firebase (FCM) | MongoDB Atlas

VTU Chat GitHub

- Building a campus-exclusive social app for VTU students, featuring posts, global and personal chat, group messaging, and a lost & found module.
- Handling real-time messaging with Socket.IO, push notifications via FCM, and media storage through Firebase Cloud Storage.
- **Stack:** Flutter (BLoC) | Node.js (Express.js, Socket.IO) | Firebase (FCM, Firestore, Cloud Storage)

Deployments

Google Play Console View Account
Registered Play Console account; planned deployment of *SheSOS* and *VTU Chat* upon completion.

Client Website — Aes Hightech Cleaning Services Live Website
Designed and deployed a business portfolio website for a client, currently live and in use.

Certifications

Python Face Recognition App View Certificate
Issued by GUVI

Education

Vel Tech Rangarajan Dr.Sagunthala R&D Institute of Science and Technology **2023 – 2026**
B.Tech Computer Science and Engineering *Chennai, Tamil Nadu*

- **CGPA:** 7.6/10
